

Essential Flora™ Product Specifications

A cornerstone of the **Burgstiner Wellness Protocol™**, **Essential Flora™** was developed to help maintain healthy levels of beneficial bacteria in the intestinal tract, further improving digestion, reducing inflammation and strengthening the very foundation of immunity.

Essential Flora delivers **15 different strains (15 billion live cells per capsule guaranteed)** of the most effective and well-researched beneficial microorganisms needed by the human body. These friendly flora or “probiotics” play a major role in our health, aiding digestion, manufacturing energy-producing B vitamins and keeping harmful bacteria in check.

Essential Flora contains a strategic balance of both resident and transient strains of bacteria that are native to humans. Resident strains are colonizers that multiply in great numbers to compete with pathogens for food and space on the intestinal wall, which is ground zero in the battle for your health. Transient strains, while just passing through, perform vital functions such as regulating pH, killing fungi and other unwanted pathogens, and eliminating toxins.

While most commercial probiotics contain only a few strains of flora and typically one to five billion live cultures, **Essential Flora** is truly a high potency and broad spectrum formula. It has therefore enjoyed broad acceptance and loyal support among health practitioners and natural product retailers alike, with consistently high praise from consumers.

SUGGESTED USE: As a dietary supplement take one (1) capsule in the morning and one (1) capsule at night, or as directed by a health professional.

These probiotic strains are temperature and acid stable. Refrigeration is not required, but recommended.

Dairy Free • Vegetarian Formula • Hypoallergenic

Free of sugar, starch, yeast, salt, wheat, corn or milk, No preservatives, artificial colors or flavors added.

CAUTION: Do not exceed recommended dosage. This product is not intended for pregnant or nursing mothers or children under the age of 18. If you have a known medical condition and have questions about the advisability of taking this product, consult your physician prior to use.
